CAREER OBJECTIVES

Motivated and detail-oriented programmer with proficiency in Java, Python, and SQL. Passionate about developing projects in Artificial Intelligence and Machine Learning.

EDUCATION

B.Tech in AIDS V.S.B Engineering College, Karur(Currently 3rd Year) CGPA: 8.49/10 Class (XII)	2023-2027 Karur
Sri Ramakrishna Public School Score: 86% Class (X)	01/03/2023
Sri Ramakrishna Public School Score: 90%	01/03/2021

PROJECT EXPERIENCE

- Real-Time AI/ML-Based Phishing Detection and Prevention System**
Built a Real-Time AI/ML-Based Phishing Detection System to detect fake URLs and suspicious content. Provides instant alerts and improves security using machine learning techniques.
- Lead Qualification Agent (LeadIQ)**
Built a full-stack B2B sales intelligence platform that scores leads using an XGBoost model and runs an autonomous LLM agent for diagnostics and outreach. Integrated a Pinecone RAG pipeline for playbook-grounded email drafts and coaching.
- OmniCure AI**
Built an AI-powered clinical assistant that parses lab reports and predicts disease risk using a RAG pipeline powered by Groq LLM. Features secure OTP authentication and a multi-turn conversational bot for report-based queries.

INTERNSHIP - LETSGAME TECH, COIMBATORE, INDIA

- Built interactive and innovative websites
- Gained practical exposure to website design and development

CERTIFICATIONS

Artificial Intelligence Primer • Data Structures • Multidimensional and Data Modelling

SKILLS

Technical Skills: Java, Python, SQL, ML
Soft Skills: Leadership, Problem Solving, Critical Thinker
